

## DAKO-DiTach

### Legal bases to operate a vehicle with a tachograph

Regulation on the implementation of the law on the accompanying provisions required since the introduction of the digital control devices for controlling the driving times and rest period (EG-Regulation 561/2006, regulation on driving personnel, law on driving personnel).

Due to law the Companies are obligate to:

- read-out the data from the mass storage device **by the end of 90 days**
- read-out the data from the driver-card **by the end of every 28 days**
- make a backup copy of all copied data and store it on another storage medium
- follow the law regulation of an archive period of one year
- analyse the data to compliance with the social provisions
- hand out saved data to relevant authority by request

**With the DiTach product packs the DAKO GmbH offers an optimal solution for every vehicle fleet to ensure the fulfilment of these demands to their full extent.**
